FAVORITE PLANS Adirondack

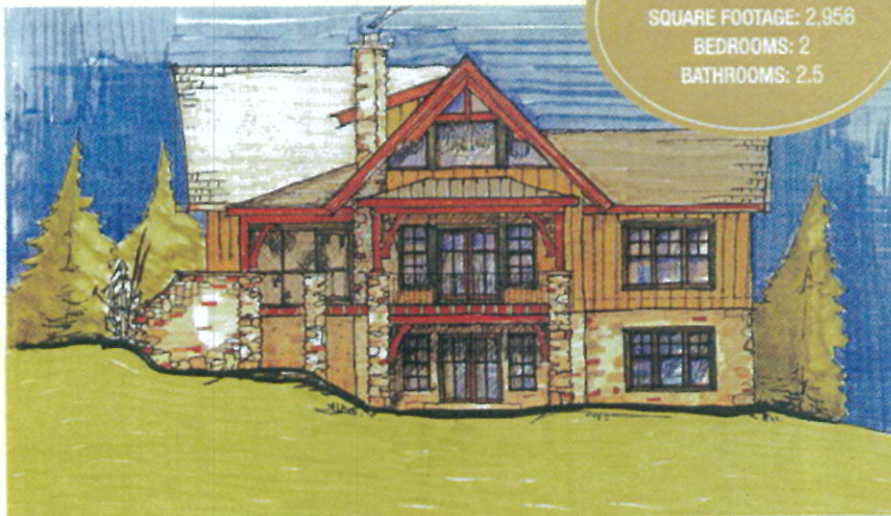

PLAN NAME: Bailey Hill

PRODUCER: Timberbuilt (in conjunction with Bailey & Harris Architects)

PRIMARY FEATURES: Rooflines create great volume in the cathedral space throughout the main living area. The finishes—board-and-batten wood siding, stone, interior white pine timbers and exterior cedar timbers—give this design a natural look that fits in well with its surroundings.

WHY THIS IS A FAVORITE: We love the placement of the covered porch, which provides a gentle indoor-outdoor transition.
